- Architectural Documentation, 44027 Preliminary Set, prepared by FPPV.

THE FOLLOWING CONDITIONS APPLY TO THIS PERMIT:

1. The permission granted for this permit will expire if one of the following circumstances applies: the permitted works have not commenced within two (2) years of the original date of issue of this permit, or are not completed within four (4) years of the original date of issue of this permit. Commencement of the permit begins with onsite physical works.
2. The Executive Director Heritage Victoria is to be given five working days' notice of the intention to commence the approved works.
3. Should further minor changes in accordance with the intent and approach of the endorsed documentation become necessary, correspondence and supporting documentation must be prepared and lodged in accordance with the permit condition for endorsement by the Executive Director Heritage Victoria. If the Executive Director considers that the changes are not minor, an amendment to the permit or a new application will be required.
4. Prior to the commencement of any of the works approved by this permit, a **Heritage Protection Plan** must be submitted to the Executive Director Heritage Victoria for approval. Once approved, the Heritage Protection Plan will be endorsed and will then form part of the permit. The Heritage Protection Plan must include a sequencing program for the approved works, details of any temporary infrastructure and services required, protection methods for the heritage place during the undertaking of the works, and a work site layout plan.
5. Prior to the commencement of any of the works approved by this permit and excluding shroud fittings to the column plinths addressed at Condition 6 and 7, a **construction ready (marked as such) set of architectural drawings and lighting design documentation**, must be submitted to the Executive Director Heritage Victoria for approval. Once approved, the drawings will be endorsed and will then form part of the permit.

design and material selection for these works, and a **physical sample to be viewed on site**, must be submitted to the Executive Director for approval in writing. This will reduce the potential for delays following the submission of construction ready drawings required at Condition 7. The detailed design plans and physical sample must address resolution of the design and material selection for the light fittings/shroud, so that they blend with the textured finish of the sandstone.

7. Prior to the commencement of works approved by this permit associated with the shroud fittings to the column plinths, a **construction ready (marked as such) set of architectural drawings and design documentation**, based on the resolved detailed design plans approved under Condition 6, must be submitted to the Executive Director Heritage Victoria for approval. Once approved, the drawings will be endorsed and will then form part of the permit.
8. Approved works or activities are to be planned and carried out in a manner which prevents damage to the registered place/object. However, if other previously hidden original or inaccessible details of the object or place are uncovered, any works that may affect such items must immediately cease. The Executive Director Heritage Victoria must be notified of the details immediately to enable Heritage Victoria representatives to inspect and record the items, and for discussion to take place on the possible retention of the items, or the issue of a modified approval.
9. All works must cease, and Heritage Victoria must be contacted if historical archaeological artefacts or deposits are discovered during any excavation or subsurface works.
10. The Executive Director Heritage Victoria must be informed when the approved works have been completed.
11. The works approved by this permit must be carried out in their entirety unless otherwise agreed in writing by the Executive Director Heritage Victoria.
