### NOTES:

1. Provide jointing to all paving areas to details and documentation. Refer Civil and Structural Engineer's drawings.
2. Subsoil drainage to be provided to all garden beds and lawn areas. Refer Civil Engineer's drawings.
3. Subsoil drainage to be provided to ALL trees. Refer Civil Engineer's drawings.
4. All garden beds to be drip irrigated.
5. All proposed trees to be drip irrigated.
6. All rooftop planting to be drip irrigated.
7. All existing pits to be treated as follows if not already apparent:  
Pit lids within pavement areas shall be paved with infill gatic lids with galvanised steel trims. Paving infill to match surrounding pavement.  
Where grated lids are required and located in pedestrian zones provide 'heelguard' grates as required.
8. All existing surfaces adjacent to works are to be made good upon completion if damaged during construction. Make good as per existing condition.
9. Design lines and intent to take precedence over actual dimensions, all setout to be confirmed on site prior to commencing works.
10. All levels to be confirmed on site.
11. All timber workmanship and materials shall be in accordance with as1684, as1684.1 and as1720 except where varied by the contract documents.
12. Timber members not sized or scheduled on the drawings shall be selected using as1684.1
13. All nails, bolts and screws shall be galvanised unless approved otherwise specified in the details or approved by the superintendent.
14. Contractor to make themselves aware of any existing underground services and cabling and make allowances for any required amendments.
15. Contractor is responsible for any damage to existing services throughout demolition and construction works.
16. Contractor to coordinate disruptive works with school's operation hours to minimise disruption.
17. All workers / contractors on site MUST have valid Working With Children Checks. Contractors without a WWC card will not be permitted access onto site.
